REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest a first tubular that mates with a second tubular and an outer tubular coupled to the first tubular and covering the connection of the two tubulars where the entire assembly is expandable as specifically called for in the claimed combination and method.

Specifically, Eppink (US 5,474,334) discloses a first and second tubular and an outer tubular connected to the first tubular. However, Eppink does not teach that the first and second tubulars are mated together or that the assembly is expandable.

Tew (US 5,332,049) discloses an assembly similar to that of Eppink and further teaches "mating" the first and second tubulars. However, Tew does not disclose that the assembly is expandable.

Simpson et al. (US 2004/0069498) discloses an expandable connection between a first and second tubular. However, Simpson et al. does not disclose an outer tubular and further does not qualify as prior art based on the effective filing date of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
